DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, and 14-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Nishida et al. (U.S. Patent 6,505,476).

As per claims 1 and 16, Nishida et al. discloses a method of optimizing a coefficient of performance of a refrigeration system comprising compressor 100, heat rejecting heat exchanger 200, expansion valve 300, evaporator 400, sensing a parameter (step 660), comparing the parameter to an efficiency parameter (step 670), determining a state of efficiency of the system (step 680), and adjusting the refrigeration system (step 690).

As per claim 2, Nishida et al. discloses carbon dioxide as refrigerant (column 1, line 35).

As per claim 14, Nishida et al. discloses the adjusting including increasing flow rate (step 690).

As per claim 15, Nishida et al. discloses increasing the opening of the expansion valve (step 690).

Allowable Subject Matter

Art Unit: 3744

Claim 7 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
